

National Child and Teen Mortality Rate (age 0-14), 2005-2014

(due to external causes)

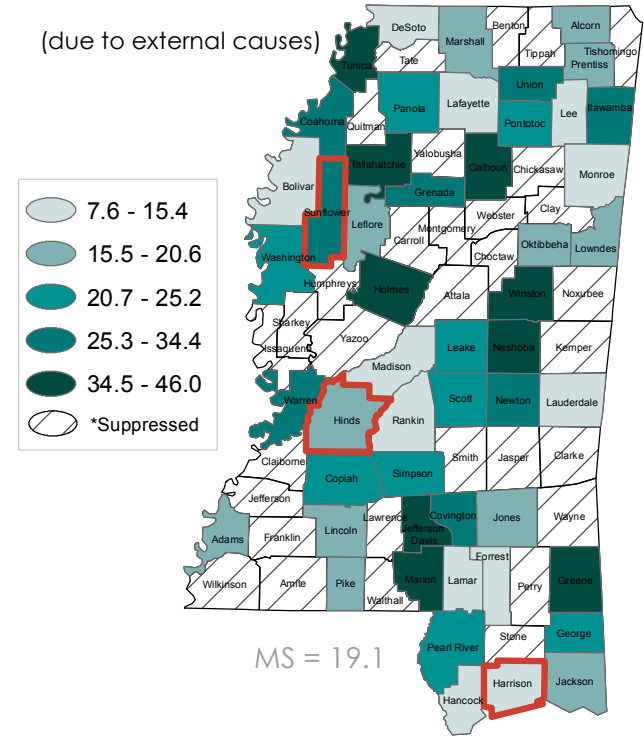

Mississippi and Alaska are the highest in the nation with a rate over 19.

MS Child and Teen Mortality Rate** (age 0-14), 2005-2014

(due to external causes)

* Suppressed due to confidentiality constraints, sub-national death counts and rates are suppressed when the number of deaths is less than 10

**Due to rural population, data in many counties is considered unreliable
